Gustavo Oliveira

Software engineer | Backend | Elixir | Phoenix | React | Java
São Paulo, São Paulo, Brasil

Resumo

Passionate developer who believes that the Agile Methodologies, Product Design and Evolutive Engineering can leverage any business to a higher level of competitiveness. Driven by communication, data and results.

Proactive, responsible, Java Developer FullStack focused in Web Systems. Known to possess strong technical knowledge and to deliver solid systems using Agile Methodologies, strong abilities in W3C Patterns, Java technologies and Web Services. Active in open source communities such as GUJ, Viva o Linux, GitHub, StackOverflow.

Other highlights of my carrer would be:

- Client has given good feedback about the team developer and works realized
- Successfully in Work Team using Scrum Agile Methodology
- Fast delivery, with commitment in all situations and high quality

Qualifications

- +3 years experienced in api development with java
- +3 years in software solutions

Experiência

Stord

Senior Software Engineer
maio de 2025 - Present (11 meses)
United States

Lolo

Senior Software Engineer
agosto de 2023 - maio de 2025 (1 ano 10 meses)

United States

Architected the entire application using Elixir, Phoenix, and LiveView, ensuring scalability, maintainability, and responsiveness.

Built highly scalable payment processing systems using Elixir and Stripe, handling complex payment workflows with reliability.

Trained the team in writing clean, maintainable, and test-driven code (TDD) in Elixir, fostering a culture of craftsmanship.

Led the team in adopting best practices for Elixir, including architectural patterns and LiveView-specific workflows.

Designed and implemented OBAN jobs to efficiently process and send large volumes of emails using SendGrid.

Developed a sophisticated and reliable solution for managing Stripe payment processing, addressing intricate business logic.

Clarus R+D

Senior Software Engineer

maio de 2021 - maio de 2023 (2 anos 1 mês)

Columbus, Ohio Metropolitan Area

Clarus R+D is a technology-driven solution for claiming the R&D tax credit.

We make it easy for innovative companies to get this money back into their businesses to hire and grow.

One of the features that helped Clarus was to provide real-time functionality, where the client can import PDF W2 and, in real-time and background, send it to an S3 to save and consume an API that transforms the data into REST and store it in the database. And alert the customer.

Helped team members follow good software development practices

Supported the team in learning new technologies.

Aided the team in following test-driven development (TDD) practices, increasing team performance.

Provided clear communication using commit messages and PRs.

Improved productivity and code delivery by creating a CI/CD pipeline using GitHub Actions and EKS.

Zubale

Senior Software Engineer

julho de 2020 - julho de 2021 (1 ano 1 mês)

United States

Connecting users via phone to our marketplace, where they can choose from an inventory of jobs nearby that they can complete as independent

contractors. In exchange, brands and retailers drive productivity, have variable costs, and have more flexibility to compete.

I helped Zubale to handle almost 1 million registers to store in the database in under 10 minutes, avoiding overtime during the week and weekend with only one API

Taught other developers, following good practices of TDD and deploying on Kubernetes.

Participated in building and replacing old technologies to create highly available and scalable applications.

Helped to build MobileApp using Geolocation for user pick orders and to deliver

Built large systems using MessageBrokers, and GraphQL with high-Quality code

Optimized an API to handle and store nearly 1 million records in under 10 minutes, significantly reducing processing time and avoiding overtime for the team.

Mentored developers on best practices for Test-Driven Development (TDD) and deploying applications on Kubernetes.

Contributed to the modernization of legacy systems, replacing outdated technologies with highly available and scalable solutions.

Assisted in building a MobileApp with geolocation features, enabling users to efficiently pick and deliver orders.

Developed large-scale systems incorporating Message Brokers and GraphQL, delivering high-quality, maintainable code.

HDI Seguros

Lead Software Engineer

julho de 2019 - julho de 2020 (1 ano 1 mês)

São Paulo, Brazil

I worked developing Restful APIs (Richardson Maturity Model Level 2) in a Digital Modernization Strategy to support the company's systems Reliability, Scalability and Maintainability. I worked developing the Open Insurance API for the fourth insurance company in market share in Brazil. Technologies used:

- Java 8
- Spring 4
- Spring Boot
- MongoDB

- Postgres
- Docker
- Kubernetes
- Progress Database
- Swagger

SWAP

Senior Software Engineer

junho de 2019 - agosto de 2019 (3 meses)

São Paulo Area, Brazil

TOTVS

Senior Software Development Engineer

outubro de 2018 - junho de 2019 (9 meses)

São Paulo, Brazil

Led the migration from monolithic services to microservices, driving digital innovation and enhancing scalability and flexibility within the company.

Concrete Solutions

Senior Software Engineer

janeiro de 2016 - outubro de 2018 (2 anos 10 meses)

São Paulo e Região, Brasil

Concrete Solutions, was the first business known for using AWS, the one is focused Lean, UX and Agile Engineer to help clients creating digital products.

Main Projects:

- Created an application where account managers can create business plan for their customers to enhance their commercial growth. REST API built with Java 8, Spring Boot 1.3, Spring 4.2, Hibernate 4.3, JUnit 4, Mockito 1.10, Maven 3, Git, Oracle 12c, Tomcat 8 and Scrum
- REST API built with Java, Spring Boot, JUnit, Mockito, Gradle and Scrum, Spring cloud, Microservices, gradle, react, angular 4
- Created automated tests for mobile apps with BDD, Cucumber, Git and Scrum

CWI Software

Software Engineer

janeiro de 2015 - dezembro de 2015 (1 ano)

Cidade Jardim - SP

CWI SOFTWARE is a Software's Fabric that produce systems with focus in satisfaction of the client.

- Successfully in Work Team using Scrum Agile Methodology
 - Interligation of many systems in Java using Web Technologies and Rest Web Services and Java Messages Services (JMS)
 - Successfully in development systems back-end and front-end using Hibernate, Spring, JSP, Angular, JQuery...
- Client has given good feedback about the team developer and works realized

Ericsson Inovação S/A

Software Engineer Intern

janeiro de 2013 - dezembro de 2014 (2 anos)

São Paulo, Brazil

As an intern, I demonstrated initiative and technical expertise by developing Continuous Integration (CI) pipelines using Jenkins to streamline the development process and improve code quality. I also designed and implemented a project to manage the company's inventory, utilizing Java and JavaServer Faces (JSF) for robust and efficient solutions. My proactive approach enabled me to identify opportunities for improvement and deliver impactful results, showcasing my ability to contribute effectively to team objectives and organizational success.

Stack: Java, JSF, HTML

Formação acadêmica

Fatec Carapicuíba

Bachelor's Degree, Internet Systems · (2012 - 2014)
